# Technical Position Papers

- Potential Study
  - Goal:
    - ✦ Solicit stakeholder input on potential study methodology.
    - ✦ Understand how potential study results used in both CEC and CPUC initiatives, and whether there are other related CEC and CPUC initiatives that may or should leverage or be aligned with the CPUC potential study.
    - ✦ Develop recommendations for improving study methodology, which may include improvements in transparency, data sources, and approaches to developing potential.
    - ✦ **ACT:** Cal TF Staff must consult with CPUC Staff to ensure Cal TF work would not duplicate what CPUC staff is already doing, or otherwise create “swirl” prior to proceeding.
- Cost Methodology
  - For statewide measures, measure costs developed using different approaches absent a consistent framework or approach for developing measure costs.
  - Goal: Develop a recommended framework for how cost for different measure types should be documented and calculated for future measures.
- Savings Methodology
  - For statewide measures, measure savings developed using different approaches absent a consistent framework or approach for developing measure savings.
  - Goal: Develop a recommended framework for how savings for different measure types should be calculated for future measures.
- TRC Methodology
  - Goal:
    - ✦ Identify differences in TRC methodologies in CA.
    - ✦ Compare to nationwide approaches.
    - ✦ Recommend a standardized cost-effectiveness methodology for CA that is supported both by CEC and CPUC.
